EDUCATION

University of the Philippines Los Baños

Expected July 2026

Bachelor of Science in Computer Science

Relevant Coursework: Software Engineering, Artificial Intelligence, Database Systems, Operating Systems

EXPERIENCE

University of the Philippines Los Baños · *Full Stack Developer* | Los Baños

Sep 2025 - Present

- Developed a **Flutter** wellness tracking app for the **OH WaW Program** targeting **11,000+ UPLB constituents**, engineering **24 Express.js/Node.js** API endpoints across a full **Flutter + MongoDB** mobile stack.
- Delivered **offline-capable meal tracking** with **on-device YOLOv11** AI detection across **95+ Filipino food classes** and a **gamification system** to drive sustained healthy behavior, ensuring full functionality without internet dependency.
- Enabled real campus event participation by building an **admin event management system** with full CRUD and **attendance tracking**, secured via **Google OAuth** and **role-based JWT authentication** across constituent and admin flows.

Moonchild Productions · *Software Engineering Intern* | Motala

Jun 2025 - Jul 2025

- Extended the **Goanna rendering engine's** CSS parser to support **5 comparison operators** (**<, >, <=, >=, =**) in **production**, modifying token scanning, expression evaluation, and serialization.
- Removed **legacy vendor prefix handling** from the **production** CSS parser, eliminating **dead code** across style property tables, parser definitions, and computed style handling.
- Self-directed across a **100,000+ line codebase** in a fully **async international team**, navigating via **GitHub issue-based workflows** and incorporating feedback from domain experts through code review.

CMSC 128 - Software Engineering · *Team Lead* | Los Baños

Feb 2025 - Apr 2025

- Led a **4-person team** building an **alumni tracking system** for the UPLB CS department, running **2 weekly sprint sessions** across **10+ one-week sprints** to keep delivery on track.
- Owned **5 schema iterations** in **MongoDB Atlas** against evolving client requirements and **team-initiated feature additions**, coordinating with **UI/UX, frontend, and backend teams**, and contributing **8 FastAPI endpoints**.

Stable Studio · *Full Stack Developer* | Hong Kong

Nov 2024 - Mar 2025

- Delivered **2 full-stack internal web applications** across a **3-person dev team**, owning schema design, **10+ Express.js API endpoints**, and **Next.js + Tailwind CSS** frontend implementation end-to-end.
- Translated client specs into **production-ready UI components and REST APIs**, coordinating API contracts with teammates to eliminate integration bugs at handoff.

PROJECTS

Sinehan · *AI Movie Recommendation Web App*

Mar 2026

- Developed a **full-stack AI movie recommender** with a **4-step Groq + TMDb pipeline** that generates mood-based picks with Filipino-voiced pitches, deployed across **Vercel, Render, and MongoDB Atlas**.
- Grew to **30+ users** with a **weekly automated email digest** via **n8n**, delivering personalized recommendations from user watchlists, secured via **Google OAuth and JWT authentication**.

Folio · *RAG-Powered Portfolio Chatbot*

Feb 2026

- Built a **RAG-powered portfolio chatbot** using **LangChain, ChromaDB, and FastEmbed** to let recruiters conversationally query a personal knowledge base, grounding **Llama 3.3 70B (Groq API)** responses with retrieved context for accurate, relevant answers.
- Implemented **markdown-aware chunking** with section-boundary splitting and **top-5 cosine similarity retrieval**, using a **fully local FastEmbed embedding model** with no API dependency, keeping inference costs minimal.

SKILLS

Languages: Python, JavaScript, TypeScript, Dart, SQL, C, C++

Frameworks: React.js, Next.js, FastAPI, Express.js, Flutter, Tailwind

Databases: MongoDB, PostgreSQL, SQLite, MySQL

Tools: Git, GitHub, VS Code, n8n, Label Studio, Docker
